SWITCH TO GAS
Sustainable Water Heating Solutions
The 20lt Room Sealed Fan Forced Gas Geyser

- Room sealed fan assisted combustion appliance
- Has a flow rate of 20L down to 2.5L
- Electronically controlled constant temperature appliance
- Digital control panel to set desired water temperature
- Can run multiple outlets simultaneously
- Low pressure start up (0.2 up to a high of 5.5 bar)
- Compact design with a brushed aluminum cover
- Can be installed in confined spaces
- Highly efficient, up to 88%
- Double exhaust system
- Multiple flame

For indoor and outdoor use (under cover)

The 16lt Constant Temperature Gas Geyser

- Domestic constant temperature appliance with natural exhaust
- Automatic water flow/gas linked ignition, automatic pulse ignition from one “D” cell torch battery
- Aluminum coated front panel
- LCD control panel to set desired water temperature
- Automatic flame height/water flow control
- Constant temperature with varying water flow
- Can mix with cold water
- Water pressure 0.3 - 5 bar

For outdoor use (under cover)  
(Additional cover recommended)

HOT WATER WHEREVER
The off-the-grid water heating solution
The 12lt Low Pressure Gas Geyser

- Operates from one-meter to a fifty-meter head of water pressure
- Can be mounted indoors or outdoors
- Must be installed with a flue
- Flow range from 12lt to 3lts/min
- Flow control tap on cold water supply
- Allows addition of cold water
- Water flow sensor no diaphragm to freeze
- Automatic start, runs on two torch batteries
- Has adjustable pressure relief valve/drain stem
- Anti-corrosive aluminum coated

For outdoor (under cover) or indoor use

HOT WATER ANYWHERE

The outdoor lifestyle water heating solution
The 6lt Camping Gas Geyser

- Instant water heater with natural exhaust
- Water gas linked automatic ignition, automatic pulse ignition from two standard torch batteries
- No pilot light
- Stainless steel front panel
- LCD temperature gauge
- Flame height, gas flow knob
- Temperature, water flow knob
- On & off switch for cold or hot water
- Water pressure 0.3 - 5.0 bar
- Starting indicator light

For outdoor use (under cover)

#### Parameters

- **Gas type, LPG**
- **Gas pressure 2800 pa**
- **Solenoid lifetime 300,000 times**
- **Water pressure min 0.3 bar or 3m**
- **Water pressure max 5.0 bar-50m**

#### Safety devices

- **Water over heating protection (75°C)**
- **Flame out gas cut off**
- **Non return valve**
- **Low flow cut off**
- **Anti freeze drain**
SWITCH TO GAS
EcoDew range of gas geysers
The 5lt (A) Low Pressure EcoDew Gas Geyser

- White baked enamel front panel
- Instant water heater with natural exhaust
- Can be used indoors without a flue
- Oxygen depletion sensor (ODS)
- Flow from 5lt – 1lt/min
- Allow for added cold water
- Water flow sensor (no diaphragm)
- Automatic ignition from two standard torch batteries
- Single gas control knob
- Cold water inlet control valve
- Water pressure 0.1 bar – 5 bar (one-meter to fifty-meter head of water)
- Adjustable pressure relief valve

For indoor & outdoor use (under cover)(no flue)

The 5lt (A) Low Pressure EcoDew Gas Geyser

- Double action water flow sensor
- Flow from 5L – 1L/min
- Oxygen depletion sensor
- Can be used indoors with a flue only
- Water flow sensor (no diaphragm)
- Over pressurization valve
- Flame out sensor
- Double gas solenoid
- Controller cut out
- Low gas consumption
- Water pressure 0.1 bar – 5 bar (or 1m to 50m head of water)
- Automatic ignition from two standard torch batteries

For indoor & outdoor use (under cover)

Gas geyser cover size guide

Below are the recommended cover sizes for the Dewhot Gas Geyser range. When ordering please ensure that you specify the correct size.

<table>
<thead>
<tr>
<th>Geyser Model</th>
<th>Medium</th>
<th>Large</th>
<th>X Large</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dewhot Standard</td>
<td>6L / 8L / 10L / 12L</td>
<td>16L</td>
<td></td>
</tr>
<tr>
<td>EcoDew</td>
<td></td>
<td>8L / 12L</td>
<td>16L</td>
</tr>
<tr>
<td>Low pressure</td>
<td></td>
<td>12L (flue roof)</td>
<td></td>
</tr>
<tr>
<td>Constant temperature</td>
<td></td>
<td></td>
<td>16L</td>
</tr>
</tbody>
</table>

If any of the appliances are being fitted with a flue, please specify that you need a flue roof (a hole in the top to allow for the flue).
Solar to Gas Valve

The valve is designed to be used in conjunction with solar water heating systems. This valve is used to divert water to the gas geyser, in order to further heat the water if the water entering the valve is not at the desired showering temperature.

1. If the water temperature is below 45°C, the water flows through the COLD water outlet and is diverted to the gas geyser to be additionally heated and then goes to the bathroom at the desired temperature.

2. If it is above the 45°C, then it goes directly to the HOT water outlet on the valve and to the bathroom.

3. The solar valve can be set to a higher diverting temperature of 50°C.
